minCord 5

With our minCord 5 inspection cameras you can easily access difficult-to-reach pipelines. Inspection systems so small and compact that they can be used in pipes from 0.5 inches.

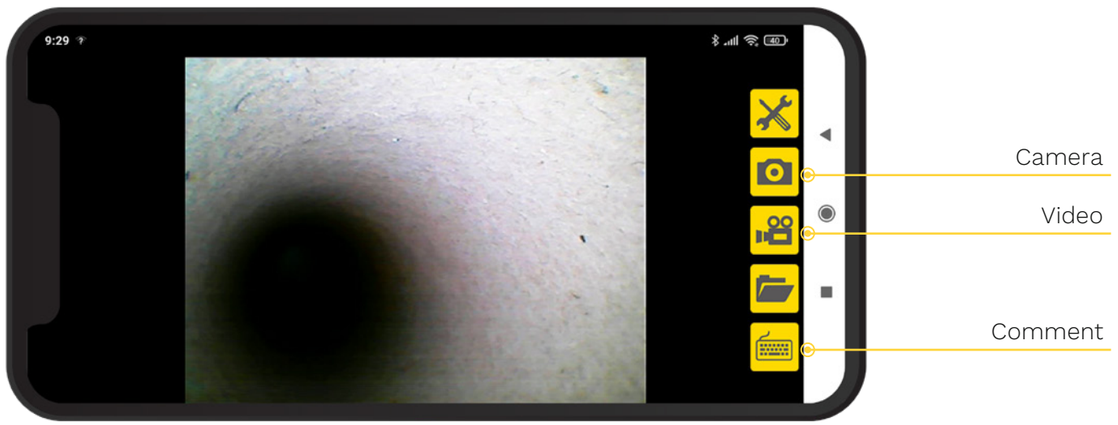
Small, compact and can be used almost anywhere.

Inspect the smallest pipelines such as drains / toilets / swimming pools with the minCord 5, which can be inserted into pipelines without any problems or disassembly of pipes / toilets.

minCam Viewer App

Inspect pipelines with the free minCam Viewer app, which allows you to comment on your inspection results with audio comments or data annotation in the image / video.

The minCam Viewer App is available for free in the App Store as well as Google Play Store and receives the video image of your inspection system via WiFi on your smartphone / tablet.



minLoc

Handy locating device especially for the application area in the house. With its compact size, our minLoc locating receiver is ideally suited for the use in kitchens, bathrooms or toilets.

Precise locating of damaged areas in pipes.

Due to the frequency (512 Hz) emitted by the locating probe built into the cameras, it is possible for the minLoc to precisely locate damaged spots in pipes.
